Professional Profile

Final-year Computer Engineering student (University of Alicante) specializing in Information Systems, focused on backend/frontend software development. Hands-on experience building full-stack applications and distributed systems in real projects, with a solid command of agile methodologies. Motivated to join a development team where I can add value from day one and keep growing as a software engineer.

Featured Projects

- **SmartFest Data** — Real-time full-stack management system for festivals, with demand forecasting via *Machine Learning*. *In development*
- **EasyCab2** — Distributed, resilient system architecture for taxi fleet management, built with Python, Apache Kafka and Node.js.
- **BookHeaven** — Full e-commerce platform for an online bookstore, built with Laravel (Eloquent ORM) and MySQL.
- **Meteor Madness** — Interactive WebGL web platform simulating asteroid impact scenarios using real scientific data. *NASA Space Apps Challenge 2025*

Experience & Achievements

NASA Space Apps Challenge 2025

International Hackathon

Participant and WebGL developer: built *Meteor Madness* against the clock, turning astronomical data into interactive visualizations; solved technical challenges as a team under high competitive pressure.

Alicante Debate Association (ADA)

Active Member

Developed critical thinking and technical argumentation in competitions; leadership and decision-making in high-pressure scenarios.

Education

University of Alicante — B.Sc. in Computer Engineering

Information Systems

4th year · Expected graduation: 2026

Technical Skills

- **Languages:** Java, Python, C/C++, C#, JavaScript / TypeScript, SQL
- **Backend & Frameworks:** Node.js, FastAPI, Laravel, React, Astro
- **Databases:** PostgreSQL, MySQL, SQLite, Redis
- **Tools & Methodologies:** Git, Docker, Apache Kafka, Scrum / Agile
- **Other:** Machine Learning fundamentals (scikit-learn) · Introduction to Solidity / Web3

Languages

Spanish (Native) ▪ Valencian (C1) ▪ English (B2) ▪ German (A2) ▪ Russian (A1)
